nguyene@saccounty.gov

Webinar Topics

- ◆ Executive Order
- ◆ When an application permit is required
- ◆ Scheduling
- ◆ Well Completion Reports

Moderator

Megan Floyd

Presenters

Derek Jacks
Noy Keovongsa

The Wells Program regulates Water Supply Wells, Monitoring Wells, Exploratory Soil Borings, Geothermal Heat Exchange Wells, Cathodic Protection Wells, and other special use wells. Any well constructed in Sacramento County must have a permit from the Environmental Management Department prior to the start of construction unless it is specifically exempted in the Code.

Abandoned Wells Impact Groundwater—Water runoff which flows into abandoned wells can carry bacteria, sediment, fertilizer, pesticides and other pollutants directly into our groundwater.
