

Coronavirus COVID-19 Cleaning Contractors

Background

COVID-19, also known as the novel coronavirus, is a respiratory illness that is spread through the air via respiratory droplets from an infected person or by touching contaminated surfaces. Symptoms of the virus can include fever, cough, and/or shortness of breath. Please check the EMD website for the most current information: emd.saccounty.net/Pages/EMD-LatestNews.aspx

Cleaning And Disinfection Recommendations In Households With Suspected / Confirmed Cases Of COVID-19

Routine cleaning of frequently touched surfaces is highly recommended using household cleaners and [EPA-registered disinfectants](#) that are appropriate for the surface, while following label instructions. Surfaces that would need routine cleaning include: tables, hard-backed chairs, doorknobs, light switches, handles, desks, phones, tablets, touch screens, remote controls, keyboards, toilets, faucets, and sinks. See specific directions for cleaning and disinfecting your facility at the [CDC website](#).

Do not mix chemicals and always follow instructions and precautions on the label, such as wearing gloves and making sure you have good ventilation while using the product.
