INTRODUCTION

This Compliance Assistance Bulletin is designed to inform underground storage tank (UST) owners, operators and testing companies that the Sacramento County Environmental Management Department (EMD) must visually inspect certain UST components every year.

WHAT DOES THIS MEAN TO YOU?

Due to liability issues and other concerns, EMD representatives do not remove sump lids or dispenser panels. Special tools and equipment may be needed in order to access portions of the UST system. For example, turbine sumps are often covered by heavy metal lids with bolts. The owner/operator is responsible for opening these UST components for inspection and may need a service technician to do this.

If an EMD representative is not present for the annual monitoring system certification testing, the UST owner will be required to provide access to the inside of the sumps, UDC's and spill buckets when the EMD representative visits the site at a later date.

EMD normal working hours are Monday through Friday, 8:00 am to 5:00 pm excluding County holidays. If a UST annual monitoring certification test is scheduled during EMD non work hours or when an EMD representative is not available, the owner/operator will be responsible for adequately opening the sumps, under dispenser containment, and spill buckets when the EMD representative inspects the facility.

WHAT IS THE UST ANNUAL VISUAL INSPECTION REQUIREMENT?

California Health and Safety Code (H&SC) Chapter 6.7, Section 25288 (a), requires local implementing agencies to inspect all UST Facilities within their jurisdiction at least once a year. This is a separate requirement from the annual monitoring system certification. The State of California Water Resources Control Board (Board) oversees EMD as the local implementing agency for Sacramento County. The Board has clarified that as part of the annual inspection, local agencies must visually inspect the inside of all sumps, under-dispenser containment (UDC's), and spill buckets.

When feasible, EMD schedules the annual UST compliance inspection to coincide with the annual monitoring system certification. EMD makes every effort to attend the UST annual monitoring certification test. However, there may be rare occasions that an EMD representative cannot attend the monitor certification. UST owners and testing companies are encouraged to contact EMD prior to testing if an EMD representative is not present at the time of the annual monitoring certification test.

Sacramento County observes the following holidays:

- New Year's Day
- Martin Luther King, Jr.'s Day
- Lincoln's Birthday
- Washington's Birthday
- Memorial Day
- Independence Day
- Labor Day
- Columbus Day
- Veterans Day
- Thanksgiving day and day after
- Christmas Day
